Dossier zur Nutzenbewertung gemäß § 35a SGB V

Fruquintinib (FRUZAQLA®)

Takeda GmbH

Modul 4 A, Anhang 4-G

Behandlung von Patienten mit metastasierendem Kolorektalkarzinom (mCRC), die zuvor mit verfügbaren Standardtherapien, einschließlich Fluoropyrimidin-, Oxaliplatin- und Irinotecan-basierten Chemotherapien, Anti-VEGF-Arzneimitteln und Anti-EGFR- Arzneimitteln, behandelt wurden und bei denen die Erkrankung unter Behandlung mit Trifluridin-Tipiracil oder Regorafenib fortgeschritten ist, oder die diese Behandlung nicht vertragen

Table 35.1.1.5.1.3B
Summary of Time to Onset of Overall TEAE by Age
Safety Population
TEAE
<65 years

Statistics	Placebo + BSC N=118	Fruquintinib + BSC N=244
Number of Subjects with Events, n (%)	108 (91.5)	240 (98.4)
Number of Subjects Censored, n (%)	10 (8.5)	4 (1.6)
Time to first TEAE (months)		
25% percentile (95% CI)	0.13 (0.07, 0.23)	0.10 (0.07, 0.13)
Median (95% CI)	0.46 (0.36, 0.66)	0.30 (0.23, 0.46)
75% percentile (95% CI)	0.72 (0.69, 1.02)	0.69 (NE, NE)
Min, Max	0.0, 4.6*	0.0, 6.8*
Comparison (Fruquintinib + BSC vs Placebo + BSC)		
Hazard Ratio (SE)		1.369 (0.120)
95% CI		(1.082, 1.731)
Log-rank p-value		0.009

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

Table 35.1.1.5.1.3B
Summary of Time to Onset of Overall TEAE by Age
Safety Population
TEAE
<65 years

Statistics	Placebo + BSC N=118	Fruquintinib + BSC N=244
Kaplan-Meier Estimates at % (95% CI)		
3 months	8.5 (3.4, 13.5)	2.0 (0.3, 3.8)
6 months	NE (NE, NE)	1.4 (0.0, 3.0)
9 months	NE (NE, NE)	NE (NE, NE)
12 months	NE (NE, NE)	NE (NE, NE)
18 months	NE (NE, NE)	NE (NE, NE)
Median Follow-up Time (months)	0.46	0.30

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.

TEAE
Mutant

Statistics	Placebo + BSC N=145	Fruquintinib + BSC N=287
Number of Subjects with Events, n (%)	130 (89.7)	283 (98.6)
Number of Subjects Censored, n (%)	15 (10.3)	4 (1.4)
Time to first TEAE (months)		
25% percentile (95% CI)	0.16 (0.07, 0.26)	0.07 (0.07, 0.10)
Median (95% CI)	0.56 (0.39, 0.69)	0.26 (0.23, 0.36)
75% percentile (95% CI)	0.72 (0.69, 1.28)	0.69 (0.62, 0.69)
Min, Max	0.0, 4.6*	0.0, 6.8*
Comparison (Fruquintinib + BSC vs Placebo + BSC)		
Hazard Ratio (SE)		1.580 (0.108)
95% CI		(1.277, 1.954)
Log-rank p-value		<.001

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.
Disease-related AE(PT) are: Disease progression, Malignant neoplasm progression, Neoplasm progression, Colorectal cancer metastatic, Tumor pain, Tumor invasion, Metastasis, Metastases to meninges, Metastases to liver, Metastases to central nervous system, Cancer pain, Lung cancer metastatic.

TEAE in SOC Term **Respiratory, thoracic and mediastinal disorders**
Male

Statistics	Placebo + BSC N=140	Fruquintinib + BSC N=241
Kaplan-Meier Estimates at % (95% CI)		
3 months	71.5 (63.6, 79.4)	61.0 (54.8, 67.2)
6 months	71.5 (63.6, 79.4)	54.3 (47.1, 61.4)
9 months	71.5 (63.6, 79.4)	49.0 (40.3, 57.7)
12 months	71.5 (63.6, 79.4)	37.9 (21.8, 54.0)
18 months	NE (NE, NE)	37.9 (21.8, 54.0)
Median Follow-up Time (months)	2.46	2.43

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

Safety Population
TEAE in SOC Term **Gastrointestinal disorders**
Female

Statistics	Placebo + BSC N=90	Fruquintinib + BSC N=215
Kaplan-Meier Estimates at % (95% CI)		
3 months	41.7 (31.0, 52.4)	41.2 (34.4, 47.9)
6 months	24.9 (7.5, 42.3)	22.9 (15.5, 30.4)
9 months	NE (NE, NE)	20.9 (13.0, 28.7)
12 months	NE (NE, NE)	NE (NE, NE)
18 months	NE (NE, NE)	NE (NE, NE)
Median Follow-up Time (months)	1.20	1.58

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.
