TEAE in SOC Term **Nervous system disorders**
Yes

Statistics	Placebo + BSC N=221	Fruquintinib + BSC N=440
Number of Subjects with Events, n (%)	35 (15.8)	109 (24.8)
Number of Subjects Censored, n (%)	186 (84.2)	331 (75.2)
Time to first TEAE (months)		
25% percentile (95% CI)	NE (NE, NE)	4.57 (2.56, 11.10)
Median (95% CI)	NE (NE, NE)	18.04 (18.04, NE)
75% percentile (95% CI)	NE (NE, NE)	NE (18.04, NE)
Min, Max	0.0, 13.0*	0.0, 20.1*
Comparison (Fruquintinib + BSC vs Placebo + BSC)		
Hazard Ratio (SE)		1.365 (0.196)
95% CI		(0.929, 2.006)
Log-rank p-value		0.132

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

TEAE in SOC Term **General disorders and administration site conditions** and Preferred Term **General physical health deterioration**
Yes

Statistics	Placebo + BSC N=88	Fruquintinib + BSC N=179
Kaplan-Meier Estimates at % (95% CI)		
3 months	98.8 (96.6, 100.0)	97.7 (95.4, 99.9)
6 months	98.8 (96.6, 100.0)	93.6 (89.0, 98.1)
9 months	NE (NE, NE)	90.5 (83.2, 97.8)
12 months	NE (NE, NE)	78.4 (61.2, 95.6)
18 months	NE (NE, NE)	NE (NE, NE)
Median Follow-up Time (months)	2.83	4.24

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

TEAE in SOC Term **Gastrointestinal disorders** and Preferred Term **Proctalgia**
Regorafenib

Statistics	Placebo + BSC N=18	Fruquintinib + BSC N=40
Number of Subjects with Events, n (%)	0	3 (7.5)
Number of Subjects Censored, n (%)	18 (100.0)	37 (92.5)
Time to first TEAE (months)		
25% percentile (95% CI)	NE (NE, NE)	NE (4.44, NE)
Median (95% CI)	NE (NE, NE)	NE (NE, NE)
75% percentile (95% CI)	NE (NE, NE)	NE (NE, NE)
Min, Max	1.8*, 6.5*	0.5, 17.5*
Comparison (Fruquintinib + BSC vs Placebo + BSC)		
Hazard Ratio (SE)		NE (NE)
95% CI		(NE, NE)
Log-rank p-value		0.274

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

Safety Population
TEAE in SOC Term **Gastrointestinal disorders** and Preferred Term **Vomiting**
TAS-102 and Regorafenib

Statistics	Placebo + BSC N=91	Fruquintinib + BSC N=179
Number of Subjects with Events, n (%)	10 (11.0)	26 (14.5)
Number of Subjects Censored, n (%)	81 (89.0)	153 (85.5)
Time to first TEAE (months)		
25% percentile (95% CI)	NE (5.36, NE)	10.18 (5.22, NE)
Median (95% CI)	NE (5.36, NE)	18.04 (NE, NE)
75% percentile (95% CI)	NE (NE, NE)	18.04 (NE, NE)
Min, Max	0.2, 8.4*	0.0, 18.0
Comparison (Fruquintinib + BSC vs Placebo + BSC)		
Hazard Ratio (SE)		0.851 (0.386)
95% CI		(0.399, 1.814)
Log-rank p-value		0.652

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

TEAE in SOC Term **Investigations** and Preferred Term **Blood creatinine increased**
Yes

Statistics	Placebo + BSC N=155	Fruquintinib + BSC N=335
Number of Subjects with Events, n (%)	4 (2.6)	15 (4.5)
Number of Subjects Censored, n (%)	151 (97.4)	320 (95.5)
Time to first TEAE (months)		
25% percentile (95% CI)	NE (3.55, NE)	NE (NE, NE)
Median (95% CI)	NE (NE, NE)	NE (NE, NE)
75% percentile (95% CI)	NE (NE, NE)	NE (NE, NE)
Min, Max	0.4*, 6.8*	0.6*, 17.5*
Comparison (Fruquintinib + BSC vs Placebo + BSC)		
Hazard Ratio (SE)		1.360 (0.570)
95% CI		(0.445, 4.158)
Log-rank p-value		0.620

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
BSC=Best supportive care; CI=Confidence interval; HR=Hazard ratio; Max=Maximum; Min=Minimum; SE=Standard error.

Table 35.1.1.6.1.3O
Summary of Time to Onset of TEAE by SOC/PT by Liver Metastases
Safety Population
TEAE in SOC Term **Investigations** and Preferred Term **Blood creatinine increased**
Yes

Statistics	Placebo + BSC N=155	Fruquintinib + BSC N=335
Kaplan-Meier Estimates at % (95% CI)		
3 months	97.7 (95.1, 100.0)	95.3 (92.9, 97.7)
6 months	92.8 (83.2, 100.0)	94.4 (91.4, 97.4)
9 months	NE (NE, NE)	94.4 (91.4, 97.4)
12 months	NE (NE, NE)	94.4 (91.4, 97.4)
18 months	NE (NE, NE)	NE (NE, NE)
Median Follow-up Time (months)	2.73	3.68

* indicates censored value.
Note: The adjusted HR and its 95% CI are estimated using unstratified Cox's proportional hazards model in which the randomization schedule stratification factors and treatment group are covariates.
P-value is calculated using the stratified log-rank test.
Follow-up time (months) is calculated as ((last dose date + 37 days) – first dose date + 1)/30.4375.
Note: Percentages are based on the number of subjects in each treatment group unless otherwise specified.
