Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

95% CI	(83.06, 95.19)		(69.20, 85.77)
Difference in Event Free Rate		11,64	
95% CI		(1.37, 21.91)	
p-value (Z-test)		0,0263	
5 Years			
Patients remaining at risk	13		8
Event Free Rate (%)	84,81		67,54
95% CI	(77.68, 91.93)		(57.54, 77.55)
Difference in Event Free Rate		17,27	
95% CI		(4.99, 29.55)	
p-value (Z-test)		0,0059	

Summaries of duration (median and percentiles) are Kaplan-Meier estimates. 95% CIs for the median are computed using the method of Brookmeyer and Crowley. Hazard ratios were estimated by Cox regression.

* Censored, NE = Not estimable.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
 * indicates convergence problem. Result is uninterpretable.
 Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
 * indicates convergence problem. Result is uninterpretable.
 Includes adverse events occurring on or after the start of treatment in randomization period.
 Clinical cut-off: 18APR2022

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Clinical cut-off: 18APR2022

Program: root/global/globalshare/morse_macros/current/prod/program/t_ae_tte_soc.sas

Output: root/clinical_studies/RO5541267/CDT30001/GO29527/data_analysis/ACE_OS_IA/prod/output/t_ae_tte_soc_sg_TTAE_EGFRALKNOUK_SP263T3_ST23_SE_18APR2022_29527.xls

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Clinical cut-off: 18APR2022

Program: root/global/globalshare/morse_macros/current/prod/program/t_ae_tte_soc.sas

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
 * indicates convergence problem. Result is uninterpretable.
 Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
 * indicates convergence problem. Result is uninterpretable.
 Includes adverse events occurring on or after the start of treatment in randomization period.
 Clinical cut-off: 18APR2022

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect

* indicates convergence problem. Result is uninterpretable.

Includes adverse events occurring on or after the start of treatment in randomization period.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
 * indicates convergence problem. Result is uninterpretable.
 Includes adverse events occurring on or after the start of treatment in randomization period.

AESI	Reference Type (MedDRA v23.1)	Methodology
Immune-Mediated Guillain-Barre	SMQ	Guillain-Barre syndrome (SMQ) narrow
Immune-Mediated Ocular Inflammatory Toxicity	Sponsor defined AEGT	Atezolizumab Ocular Inflammation Toxicity AEGT consisting of the following PTs: Anterior chamber inflammation, Atopic keratoconjunctivitis, Autoimmune eye disorder, Autoimmune retinopathy, Autoimmune uveitis, Chorioretinitis, Chorioretinopathy, Choroidal detachment, Choroiditis, Corneal endotheliitis, Detachment of macular retinal pigment epithelium, Detachment of retinal pigment epithelium, Diffuse lamellar keratitis, Episcleritis, Eye inflammation, Immune recovery uveitis, Immune-mediated uveitis, Iridocyclitis, Iritis, Keratitis, Keratitis interstitial, Necrotising retinitis, Necrotising scleritis, Non-infectious endophthalmitis, Noninfective chorioretinitis, Noninfective conjunctivitis, Noninfective retinitis, Ocular pemphigoid, Ocular vasculitis, Optic neuritis, Optic neuropathy, Optic perineuritis, Papillitis, Punctate keratitis, Retinal detachment, Retinal vasculitis, Retinitis, Retinopathy, Retinoschisis, Rheumatoid scleritis, Scleritis, Serpiginous choroiditis, Superior limbic keratoconjunctivitis, Ulcerative keratitis, Uveitis, Vitritis
Autoimmune Hemolytic Anaemia	SMQ	Haemolytic disorders (SMQ) narrow
Immune-Mediated Adrenal Insufficiency	Sponsor defined AEGT	Atezolizumab comprehensive adrenal insufficiency search AEGT consisting of the following PTs: ACTH stimulation test abnormal, Addison's disease, Adrenal androgen deficiency, Adrenal atrophy, Adrenal insufficiency, Adrenal insufficiency neonatal, Adrenal suppression, Adrenalitis, Adrenocortical insufficiency acute, Adrenocortical insufficiency neonatal, Adrenocorticotrophic hormone deficiency, Adrenogenital syndrome, Aldosterone urine abnormal, Aldosterone urine decreased, Apituitarism, Biopsy adrenal gland abnormal, Blood aldosterone abnormal, Blood aldosterone decreased, Blood corticosterone abnormal, Blood corticosterone decreased, Blood corticotrophin abnormal, Blood corticotrophin decreased, Blood corticotrophin increased, Corticotropin-releasing hormone stimulation test, Cortisol decreased, Cortisol free urine decreased, Dexamethasone suppression test, Dexamethasone suppression test positive, Glucocorticoid deficiency, Glucocorticoids abnormal, Glucocorticoids decreased, Hydroxycorticosteroids urine abnormal, Hydroxycorticosteroids urine decreased, Hypoaldosteronism, Hypothalamic pituitary adrenal axis suppression, Mineralocorticoid deficiency, Primary adrenal insufficiency, Scan adrenal gland abnormal, Secondary adrenocortical insufficiency, Steroid withdrawal syndrome, Triple A syndrome, Urine cortisol/creatinine ratio abnormal, Urine cortisol/creatinine ratio decreased
Immune-Mediated Diabetes Mellitus	Sponsor defined AEGT	Atezolizumab Diabetes/DKA (excludes hyperglycemia) AEGT consisting of the following MedDRA PTs: Diabetes mellitus, Diabetic coma, Diabetic hyperglycaemic coma, Diabetic ketoacidosis, Diabetic ketoacidotic hyperglycaemic coma, Fulminant type 1 diabetes mellitus, Ketoacidosis, Latent autoimmune diabetes in adults, Type 1 diabetes mellitus
Immune-Mediated Hypophysitis	HLT	Hypothalamic and pituitary disorders NEC
Immune-Mediated Myasthenia Gravis	HLT	Myasthenia gravis and related conditions
Immune-Mediated Myocarditis	Sponsor defined AEGT	Atezolizumab Myocarditis Immune-Mediated AEGT consisting of the following PTs: Autoimmune myocarditis, Eosinophilic myocarditis, Giant cell myocarditis, Hypersensitivity myocarditis, Immune-mediated myocarditis, Myocarditis
